

## Tribute to Marginalised

**11 January 2018**

Making machines for man to reach Moon n Mars. Then why not to reach the manholes. Again is there a caste class issue by the elitist of the society who decides where to put the money. What is keeping us away from mechanical approach to it.

**11 April 2017**

I wish the SC also orders the salary of sanitation workers and other class four workers to be at par with doctor, engineer, IT, teacher, politician... Formal Education cannot be decisive of income.. The work must be...

Besides, Automation of such works are must...if we can go to moon by machine why not into manholes...

If I become a Minister. I will put this proposal for discussion..
