Vertical Forest.... I don't believe in this kind of nature building.. ARCHITECTS/PLANNERS are destroying the land.... Such projects are just USP for new idea and selling... If the energy consumption of such buildings are accounted then the truth will be out... Professionals start practicing Ethics and not only Employment...

Beyond Innovation... The Elites endless Greed... Innovation is useful when it is good for mankind... I have difficulty in finding goodness to mankind in such projects. Nevertheless, it is an another interesting and expensive investment at the cost of many needy people, let alone the Dubai's labor population living in sheds and containers. The spaces in this building will be owned by those who may already have ten more such spaces. Pity the Capitalists who are suckling the resources several times more than they should.

Celebrate the Railways. A very Impressive Public Transport across the country. A Train is a Country by itself.

Long time I've taken a Train Trip in India...Soon Hopefully!

OMG! Height of Plagiarism of Architecture in China...

It is certainly not awe-inspiring..It is intimidating..

I pity the Architects who did these copy-cats...

To all my students and colleagues...Please don't do this...

This is emphasizing the things that are already Wrong...

Ironically Architecture and Aesthetic are still not integrated in public buildings in India where actually there is so much opportunity to do so. We have to blame ourselves besides the lack of vision of the public authority that goes with low tender approach. And the cumbersome bureaucracy and favoritism that keeps several genuinely interested architects away from the business.

14 July 2017

For a sustainable building and living, a lot has to change at users energy/resource consumption behaviour, including that of the architect's n clients. For rich clients like Apple n AMazon, sustainability is more a fashion to market their products. But a least it is part of the discourse among the economic giants.

https://l.facebook.com/l.php?u=http%3A%2F%2Fwww.archdaily.com%2F875782%2Fhow-sustainable-is-apple-parks-tree-covered-landscape-really%3Futm_medium%3Demail%26utm_source%3DArchDaily%2BList&h=AT3ly_cqmN9wI0cSYclZ3ZdjXUsPV1HXjTHPBoL2TRT0HiLJee5p-

23 May 2017

Interesting Concept and Structure...but not convinced about the argument that it can address world's hunger!

Again, Sustainability on Sale...

Sustainability through consumerism will not give us answers to the world problems. We need Sustainability through lesser consumption and conservation. And therefore Sustainability lessons are more required for the world's rich than the poor.

18 May 2017

Cities have stopped treating human as human

We are like parts of a machine (called city) just like in a factory..

<http://www.thehindu.com/opinion/columns/indias-coming-urban-mega-crisis/article18401689.ece>

6 May 2017

That is a monument....! structure, history, passion, economy, tourism...importantly built as almost a private project...

not like shivaji statue or statue of unity planned out of public tax money.....none of the big statues around the world are built by the government, be it statue of liberty, the brazil's jesus.. and more...

<https://www.facebook.com/scroll.in/videos/1385379201544956/>
